

AIDIAN

Your aid
in diagnostics

Our story

Aidian in a nutshell

We are a Finnish-based IVD company with almost 50 years of experience in developing and manufacturing reliable, fast and easy-to-use diagnostic tests especially for primary care.

Our aim is to aid global health by promoting efficient and fluent healthcare. We focus in developing products that meet the demands of our customers, today and tomorrow. We offer our customers and partners the best solutions and service with a customer-focused mindset, high-quality products and agile operations.

Our global footprint covers over 60 countries and our [QuikRead go®](#) flagship products are used globally, with over 60,000 placed instruments.

Through our product offering we direct responsible and sustainable use of antibiotics and support Antimicrobial Stewardship in healthcare.

Greetings from our CEO

Aidian is a great example of Nordic medtech succeeding in competitive international markets. We are a successful company and proud of our Finnish roots. As a stand-alone point of care specialized diagnostics company, we focus on developing and manufacturing products and services for improving the well-being and the quality of life for people around the world. Our easy-to-use tests provide rapid, high quality and cost-effective results.

Juho Himberg

Our customers

Healthcare

Healthcare professionals around the world have a pressing need to efficiently diagnose increasingly informed patients in order to lean healthcare operations and costs.

Primary care

Reliable and timely diagnostics is especially important in versatile primary care settings where every minute counts.

Industry

Easy on-site hygiene monitoring in challenging industrial environments help to ensure high level of cleanliness of both surfaces and liquids.

Clinical laboratories

High-quality and innovative molecular diagnostics and clinical microbiology solutions support the needs of clinical laboratories.

Our personnel

Our dedicated and experienced personnel is the heart of Aidian. We strive for continuous evolvement and positive teamwork for the benefit of our customers.

Approximately 240 employees are working in various functions at our Head Quarters in Espoo, Finland.

In addition, more than 60 persons are working at our local offices in [12 different countries](#): Sweden, Norway, Denmark, Germany, Netherlands, Belgium, Czech Republic, Slovakia, Hungary, Poland, Estonia and China.

“What keeps us going and wanting to do better every single day is that at the end of the day we are making the world a better place – one correct treatment decision at a time we support in tackling one of the biggest threats of global health, Antimicrobial Resistance.”

Mission

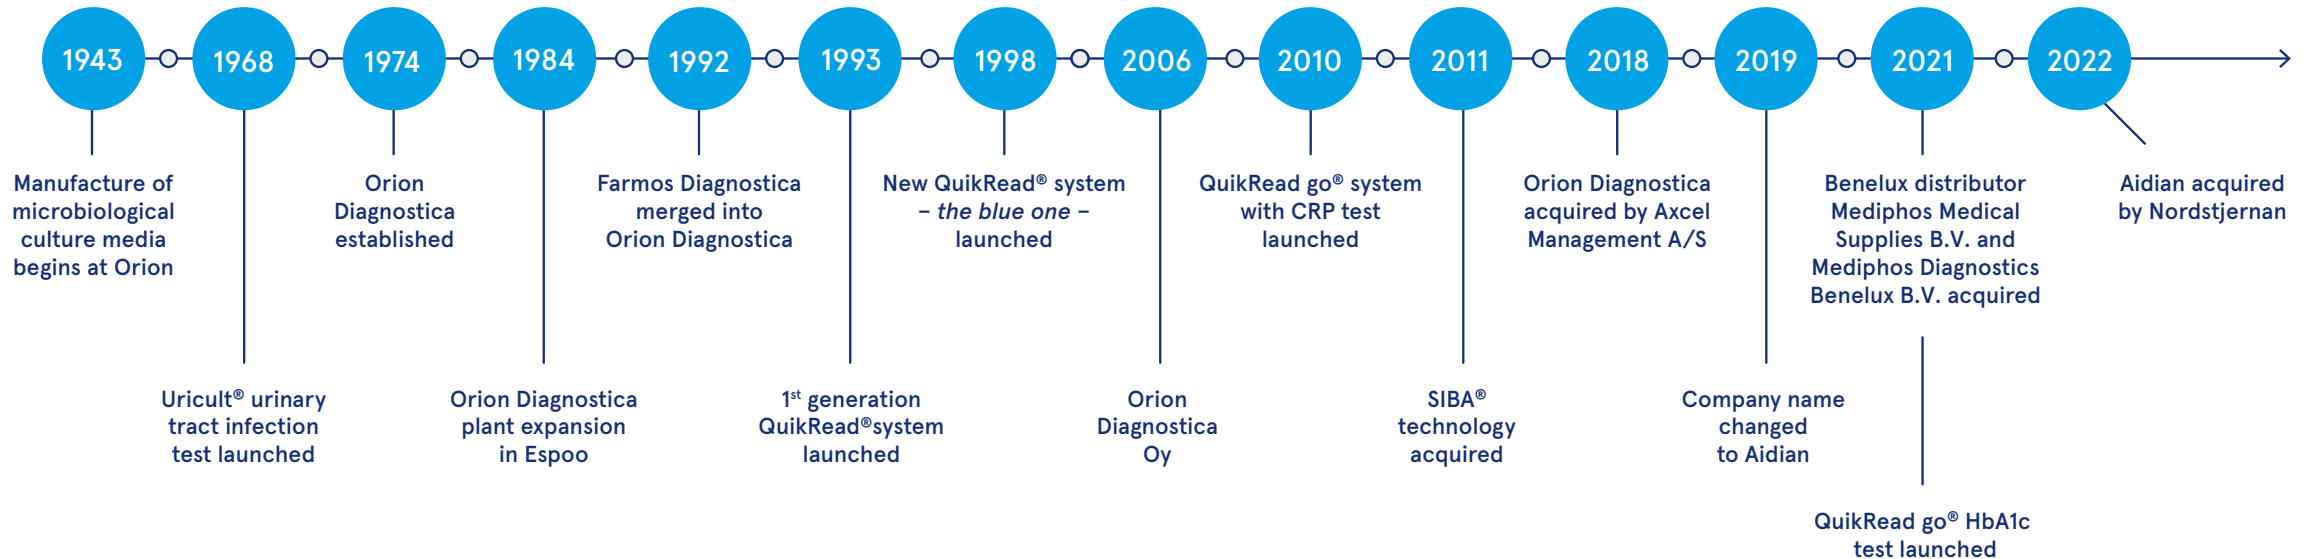

To be the best partner for our customers by using our knowhow to offer cost-effective and smart solutions for primary care.

Vision

Aid health globally by promoting efficient and fluent healthcare.

Our history – close to 50 years of experience

Production

Our manufacturing is a combination of highly automated processes for mass production and specialized small-scale production. Our products are manufactured using qualified production equipment in a controlled production environment.

Our committed and skilled personnel set the bar high and work hard to continuously improve the operations. Key-words as high quality, cost-efficiency and lean principles drive our daily decisions. Our very own plastic factory is the foundation, which secures operational reliability and our high quality standards.

Research and Development

Our R&D consists of a multidisciplinary team that is responsible for developing new test systems and features, and new analytes to our existing platforms. In addition to our R&D team, the entire Aidian personnel takes part in the development process of turning ideas to complete commercial products.

Quality management

Quality is a cornerstone of all that we do. We want high quality, reliability and safety to underline our actions. Our quality management system is fully in compliance with ISO13485:2016 as well as FDA QSR requirements. In addition, we are compliant with the new IVD regulation. Our experienced quality team is also here to support you in registration needs for your territory.

Sustainability

We are committed to operating in a responsible and sustainable manner. Patient safety is the guiding value in all Aidian's operations. Ethical, lawful and responsible business operations are essential for us in all situations.

Minimizing the environmental impact is our guideline, starting at the very beginning of the development, and continuing throughout the whole life cycle of the products.

Aidian is a participant of the UN Global Compact, the world's largest corporate sustainability initiative, and the Responsible Care® programme, the global chemical industry's voluntary sustainability programme.

Partnering

Our many long-lasting partnerships prove that Aidian is a fair and reliable partner. Successful partnerships are our business priority.

Distributor for our products: We are constantly looking for new reliable partners to distribute our products.

Distributor for well-established suppliers' products: We sell products by well-established diagnostics manufacturers and are seeking new innovative products to complete our own offering.

OEM

With almost 50 years of experience in clinical diagnostics and hygiene monitoring businesses and certified quality management system, we offer our expertise and top-quality solutions to companies interested in OEM cooperation.

Licensing

We are actively seeking licensing and partnering opportunities for our novel, exclusive, IPR protected isothermal amplification technology, SIBA[®], suitable for a broad range of molecular diagnostics markets.

Collaboration

We collaborate with research groups and development partners to discover new ways to address our customers' needs for novel and rapid diagnostics.

Point of care diagnostics

Point of care - the path to better, more efficient and cost-effective healthcare. Aidian advocates [early screening](#) and [immediate analysis](#) of patients to ensure the most beneficial treatment path and to quickly provide valuable data to support the correct diagnosis and treatment decision.

Point of care testing aids in increasing diagnostic certainty and reducing overprescribing of antibiotics. Proper use of antibiotics is key in fighting against antimicrobial resistance (AMR), a global health threat. Testing before prescribing using fast and accurate point of care tests guides rational antibiotic prescribing.

QuikRead go[®]

QuikRead go Instrument is a compact and versatile point of care system designed to support rapid treatment decisions especially in primary healthcare settings. This fully automatic and portable instrument is used for quantitative and qualitative measurements together with the ready-to-use QuikRead go reagent kits. The instrument can be connected to LIS/HIS systems and to Aidian Connect mobile application.

Available analytes: [CRP](#), [CRP+Hb](#), [HbA1c](#), [Strep A](#), [FOB/FIT](#)

Our QuikRead go product range offers 5 different tests for measuring CRP to ensure the perfect fit for your specific needs!

Microbiology

We offer reliable and easy to use microbiological tests for infection diseases such as urinary tract infection. Additionally, our microbiology portfolio consists of cost-efficient tests for checking microbial contaminations in various industrial settings to ensure high quality of industrial production.

Hygicult[®], Easicult[®]

Novel printed tests and dipslides for rapid testing of cleanliness and contamination in healthcare and industrial processes.

Uricult[®]

On-site dipslides for urinary culture for laboratories and point of care use.

UniQ®

Aidian's UniQ Collagen assays are serum assays intended for measuring bone turnover and detecting connective tissue changes. Monitoring the collagen metabolism can be used to detect and manage a range of different bone and soft tissue disorders.
