

Rapid and reliable detection of SARS-CoV-2 antigen

COVID-19 is a disease caused by a novel coronavirus (CoV) SARS-CoV-2 also known as 2019-nCoV. In order to facilitate patient management and to identify infected individuals, especially those at risk of complications, it is essential to be able to rapidly detect the presence of SARS-CoV-2.

The high quality [Biosynex Covid-19 Ag BSS test](#), enables rapid detection of SARS-CoV-2 antigen from nasopharyngeal swab.

Tests available now – Contact us for further information!

Biosynex Covid-19 Ag BSS
25 tests

Product no Ordering no
SW40006 154700

**Manufactured
in Switzerland**

Results in only 15 minutes!

Excellent performance
to ensure reliable results

- Sensitivity 96 %*
- Specificity 100 %

*Sensitivity based on the CT values of the clinical specimens Ct 0-20: 96%, Ct 21-30: 98%, Ct 31-35: 94%.

Ease of use

- Only a **few steps** from sample to result
- All necessary materials **provided in the kit**, including the needed sampling swabs
- Room temperature storage (2-30°C)
